**MINING PERMIT
PROCEDURES**

Page 1

The Filing Fee for a Mining Permit is \$250.00

1. Discuss the proposed construction work with County Planning staff member(s).
2. Provide the staff member with a legal description of the property involved in the request. The staff member will assign the date of the public hearing and will assist you in completion of the application form which is to be signed by the owner(s) of the subject property.
3. A fee of \$250.00 must be submitted with the application. A site plan, drawn to scale, which shows the boundaries of the property involved in the request, the scope and nature of work to take place, any existing and/or proposed buildings, access, etc., must be submitted at the time of application.
4. Staff will then assign a review date before the Planning Commission.
5. The Planning Staff will route the Mining Permit request to various City/County and/or State agencies for review. Once all comments are returned, staff will prepare a staff report for the Planning Commission and County Board's consideration.
6. You will be provided with a copy of the staff report and the agenda for the Planning Commission meeting at which your request will be considered. It is recommended that the petitioner or a representative attend the Planning Commission meeting to answer any questions. The Planning Commission reviews the mining request and then makes a recommendation to the County Board. The County Board takes action on the request.
